Version: 6
Product Group: Plastic & IBC

Referring to the European Directive 94/62/EC (and amendment 2004/12/EC) on Packaging and Packaging Waste and the US CONEG

We declare that the plastic packaging's & composite IBC manufactured by us comply with the requirements as in the European Directive 94/62/EC on packaging and packaging waste and that the environments were taken into account at the design and the production of the packaging.

The compliance testing was performed on the basis of the requirements stipulated in the CEN standards (EN 13427 – 13432)

Taking into account the logistical and legal requirements the packagings and composite IBC are reduced in weight and volume.

For the manufacturing of the packagings and composite IBC inner bottle almost only polyethylene and polypropylene are used and therefore, in case of energetic recovery, a positive heating balance as defined in EN 13431 is given. The packagings and composite IBC are drainable and due to the used materials are suitable for material recycling (EN 13430). A recovery by composting and biodegradation according to En 13432 is not possible.

The used materials fulfil the requirements in regard to heavy metal amounts (Amount of Pb, Cd, Cr-VI and Hg <0,01% or 100 ppm resp.) and in regard to the amount of environmentally hazardous components. This product also fulfil the requirements set with the CONEG Model Legislation in respect to the defined limit for the sum of heavy metals (lead, mercury, cadmium and hexavalent chromium).

With regard to the Commission Decision 2009/251/EC we hereby certify that the composition of materials and master batches processed for the manufacture of our IBCs and Plastics Packaging does not contain any biocide dimethyl fumarate.

We also confirm that the substances restricted in Directive 2011/65/EU and Directive 2015/863/EU (RoHS) are neither used in the manufacture of the packaging nor in that of the raw material. However, this packaging has not been tested for these chemical substances.

This declaration of conformity does not release the user of the packaging from his duty to apply the requirements in accordance with his responsibilities.

The conformity is declared on the basis of the date of issue of this declaration and is valid for two years.
